

SPA LUMINA

ENHANCED LASER & SKIN CARE

Spa Lumina specializes in cosmetic laser treatments and uses the Cutera Xeo Laser, winner of the American Dermatology Association's "Laser of the Year" award. This laser is exclusive to Spa Lumina in Barrie. It has a wide variety of applications including hair removal, treatment of acne and acne-related scars, wrinkles, removal of unsightly veins, reduction of stretch marks, removal of age/sun spots as well as pigmented blemishes.

Spa Lumina has cosmetic procedures that can reverse the signs of aging and other sun-related problems. Intense Pulsed Light treatments (IPL), often referred to as a Photofacial can be used to remove brown spots, pigment, and rosacea. The IPL treatments are performed with a non-invasive medical system that uses intense pulsed light therapy to reduce melanin, the dark pigment in skin. After the treatment the pigment will gradually fade and slowly disappear.

As well as laser treatments, Spa Lumina offers a wide variety of other cosmetic treatments. One of the most popular is Botox, an injectable substance that improves the appearance of forehead worry lines, frown lines, laugh lines and crow's feet. Botox, injected by the smallest needle available, works by blocking the impulse from the nerve to the tiny facial muscles that are related to expression lines. Botox can also be used to treat migraines and excessive sweating.

Spa Lumina offers free consultations as well as evening appointments so you can decide if any of the above remarkable treatments are suitable for you. All treatments are supervised by Dr. Sohail Gandhi, MD, CCFP, FCFP. Dr. Gandhi's experience allows him to consider any health concerns a client may have when determining a course of cosmetic treatment. "At Spa Lumina, we illuminate the natural beauty within each person," says Dr. Gandhi. "We are proud to offer a wide range of cosmetic treatments, to ensure our clients' needs are met."
