“The focus for Spa Lumina has always been to find the best in light based skin treatments for our clients,”

states Dr. Gandhi, Medical Director of Spa Lumina. The root of the clinic name comes from “lumen” which is the Latin word for light.

Over the past three years Spa Lumina has established itself as Barrie's leading Medical Spa, providing its clients with a wide variety of services including Botox, Fillers, laser hair reduction, laser vein removal, chemical peels, micro-dermabrasion, skin resurfacing, skin tightening, and most recently, a wide variety of Aesthetics services. These advanced cosmetic treatments were traditionally considered exclusive only for the wealthy and the famous, but with improvements in technology, and increasing social acceptance, these treatments have now become more accessible and appealing to the general public.

In recent years, there has been a large increase in the number of spas and clinics offering laser and other advanced treatments. The majority of such clinics are reputable and work hard to satisfy the needs of their clients. However, some have taken advantage of lax regulations to increase their profit margins, in a very competitive market. It is currently legal in Ontario for anyone to purchase a cosmetic laser and operate it without any training as there are no government regulations to monitor this industry.

Spa Lumina's focus and priority has always been taking care of each client who chooses to have treatments performed there. It is mandatory that whoever wants to have an advanced treatment w*ina's nurse (Loribeth) or Dr. Gandhi himself. In fact, both Loribeth and Dr. Gandhi are now certified trainers for Cutera (the manufacturer of Spa Lumina's laser) and are able to train others in techniques developed exclusively at Spa Lumina.

Spa Lumina's success has also been mirrored by the success of Dr. Gandhi. In a very short period of time, Dr. Gandhi has developed techniques that have made him a much sought after trainer and speaker. He has lectured to doctors on his techniques for skin rejuvenation from Vancouver in the west, to Alabama in the South and Dubai in the east. “Our focus has always been on providing safe, but leading edge techniques to clients,” he says. “We've been able to create unique combinations of laser technologies in a safe manner, to deliver more remarkable results for our clients.”

“We believe that our focus on quality treatments as well as the professional and experienced staff we employ is the reason we have been honoured with the Top Choice award,” states Dr. Gandhi.

So what is next for Spa Lumina, the Top Choice for laser hair removal in Barrie? Spa Lumina is planning an expansion of their facilities to accommodate the increasing demand for their services. An aesthetician has been hired as many clients are requesting general aesthetic services. Dr. Gandhi has also assisted in co-developing a line of skin care products, Zahrah Skincare, to augment the laser treatments and help maintain the treatment results for as long as possible. Amongst all of these new horizons, they will continue to focus on their first and foremost priority, the clients who make Spa Lumina their Top Choice for these services.
